Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicants' amendment dated 07/01/2005 has been received and entered. By the amendment, claims 1-16 are now pending in the application.

Applicant's arguments dated 07/01/2005 have been considered but are moot in view of the new ground(s) of rejections as follow:

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsushita et al., US Patent No. 6,885,418.

Regarding the above claims, Matsushita et al. disclose a transfective electrooptic device (figures 13-14) comprising:

- . a plurality of pixel regions arranged in a matrix pattern with a liquid crystal layer (abstract);
- . a reflective layer (11);
- . a color layer (10) having an opening (20).

Matsushita et al. do not disclose the opening having a shape with no corner (e.g., circular, oblong) or polygonal or incision section. It would have been an obvious to one having ordinary skill in the art at the time the invention was made to employ a non-corner shape opening or a

polygonal shape opening or incision section corresponding to the reflective layer since the examiner takes Office Notice of the equivalence of such opening and the Matsushita et al. opening for their use in the display art and the selection of any of these known equivalents for the purposes of color adjusting would be within the level of ordinary skill in the art.

Note: the method of for manufacturing the device is merely a list of forming each component and each component must be formed to make the device; therefore, the method of for manufacturing would be inherent to the device.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
